

Alaris Smart Touch technology

Scan and send information with one-button ease

Alaris Smart Touch simplifies complicated scanning processes

Smart Touch is exactly what it sounds like: a streamlined, intelligent way to eliminate multi-step scanning processes with the touch of a button. Smart Touch, available as a free download, works with most scanners from Alaris*.

Using the interface on your scanner from Alaris, easily configure nine to 20 different functions (depending on scanner model) to quickly perform common scanning tasks. Scan a document to a file location, as an email attachment, to printers, applications, or the Cloud quickly and easily. You can save documents in a variety of formats, including PDF, Microsoft Word, as well as image files like JPEG and PNG.

The Alaris S2000 Series Scanners allow for up to 20 tasks to be defined. Nine shortcut tasks are predefined but all can be easily customized to fit into your application needs. To add additional tasks to the pre-populated list, select the <NEW> option at the bottom of the Task Shortcut List.

- | | |
|------------------------------------|-----------------------------------|
| 1 Color PDF | 6 Black and White Multi-page TIFF |
| 2 Black and White PDF | 7 E-mail Black and White PDF |
| 3 Black and White RTF | 8 Custom Color PDF |
| 4 Color JPEG | 9 Custom Color File(s) |
| 5 Black and White Single-page TIFF | 10 <NEW> |

Multiple functions deliver multiple advantages

Automatically attach scanned documents to an email

- Reduce post-scanning steps required to share documentation

Scan documents into PDF, Microsoft Word, and image file formats

- Improve productivity and efficiency of collaboration and workflows
- Create image-only and searchable PDF files
- Use Optical Character Recognition (OCR) to instantly search content and benefit from copy and paste tools on scanned documents, eliminating the need to revise and correct manually
- Quickly bring paper-based documentation into your digital back-office systems with minimal retyping

Output to folders or Cloud services in many formats

- Simplify scanning of paper documents into your document workflows
- Save as TIFF, JPEG, BMP, PDF, sPDF, PNG, Word and other popular formats
- Send to common destinations like Microsoft Office, Adobe Acrobat, Microsoft SharePoint, Evernote, Box, Google Drive, and many other third-party applications

Print your documents on any networked office printer

- Reduce the need for Multi-Function Printers (MFPs) by scanning to networked print devices instead of photocopying

Gain efficiency, security, and bottom-line benefits

- Automate document scanning tasks with minimal staff training
- Empower anyone to scan and send with ease
- Rapidly deploy multiple configurations to many PCs
- Enforce your corporate naming policy without user input
